

## Hand Grenade Smoke Coloured

### Application:

Smoke grenades provide to combat forces a means of communication and signalling during daylight. Besides individual signalling codes smoke grenades are used to mark e.g. landing zones with the indication of wind for helicopter pilots.

### Description:

The smoke grenade consists of a cylindrical body filled with a smoke composition which is ignited by a fly-off-igniter, which is integrated into the closure lid of the grenade. Upon ignition the smoke grenade will produce a dense coloured smoke over the specified period.

### Operation:

1. Place smoke grenade into throwing hand; fly-off lever pointing inwards.
2. Remove safety ring.
3. Throw smoke grenade downwind side.

### Specifications:
