

Rocket Hand Fired Cluster - Red, White, Green

Application:

Efficient reconnaissance is essential during night operations of ground forces. The Rocket Hand Fired Cluster White provides visibility during night missions and the cluster Red and Cluster Green offers signalling during said operations, Infra-red illumination in addition provides an enhancement of the night vision capability of ground forces.

Description:

The Rocket Hand Fired Cluster is equipped with a standard rocket propellant which reliably carries the payload in the fired direction. At the apex of the flightpath, a cluster of four either white, (illumination) or red (signalling) or green (illumination) will be expelled from the rocket.

Operation :

1. Remove protection cap at bottom of launching tube by turning left.
2. Hold launching tube into firing direction, with an angle of approx. 45° (for Illumination) and vertical (for signalling)
3. Pull lanyard briskly downwards.

Rocket will start without delay

Specifications:

Length:	287mm
Diameter:	32mm
Diameter at handle:	38mm
Weight:	260g nominal
Burning time:	5 Sec. nominal
Light colour:	red, white, green
Ignition method:	Pull-wire-ignitor
